

# BOID10 – SAP BusinessObjects Information Design Tool

**Duration:** 5 Days

**Cost:** \$4,335

**Delivery Type:** Instructor Led – Virtual Classroom

**Goals:** This course is designed to give you the comprehensive skills needed to work with the Information Design Tool. The Information Design Tool enables designers to extract, define, and manipulate metadata from relational and OLAP sources to create and deploy SAP BusinessObjects universes.

In this course you learn how to use data from different source systems (SAP and non-SAP) to design universes to be used with the SAP BusinessObjects BI client tools.

**Audience:** System Administrator, System Architect, Technology Consultant, Application Consultant, Data Consultant/Manager, BI Developer, Database Administrator

**Prerequisites:** Working knowledge of SQL and relational databases, concepts and structures. If needed, a working knowledge of OLAP databases, concepts, systems and structures.

## Content:

- SAP BusinessObjects Business Intelligence Platform
  - Review the Business Intelligence Platform Architecture and Process Flows
- Installation of SAP BusinessObjects Business Intelligence Platform
  - Review the Installation process for SAP BusinessObjects 4.3 Server components
